PROFILE

Full-stack developer based in Berlin with hands-on experience across WordPress, PHP, and Next.js, including custom WordPress themes built entirely from scratch. Currently pursuing an MSc in Data Science at Arden University Berlin. Built a restaurant management system actively used in production by a real business.

EXPERIENCE

Freelance Web Developer

05/2024 – 12/2025

Self-employed

- Acquired clients independently and delivered full websites end-to-end
- Built custom WordPress themes with ACF, PHP and Elementor
- Implemented image compression and performance optimizations to improve load speed
- Applied on-page SEO practices to improve search visibility
- Handled client communication, requirements gathering, and deployment

WordPress Web Developer

09/2023 – 03/2024

Wildstone Solutions Pvt. Ltd.

- Built and customised WordPress sites for travel, e-commerce, and cargo clients
- Integrated WooCommerce, ACF, REST APIs and third-party plugins
- Implemented caching plugins (WP Super Cache) to improve page load speed on client sites
- Designed page layouts in Figma before development
- Ensured mobile-responsive output across all projects

EDUCATION

MSc Data Science

05/2026 – 05/2027

Arden University, Berlin

BSc Computer Science

2019 – 2024

Vedas College, TU, Kathmandu

Native

Hindi

Fluent

AVAILABILITY

Weekly Schedule

- Mon / Tue / Wed / Sat (classes Thu & Fri)
- Up to 20 hrs/week

PROJECTS

Arcline Studio — Custom WordPress Theme [↗](#)

- Built a fully custom WordPress theme from scratch — no page builders, no frameworks
- Implemented custom post types, ACF integration, and complete template hierarchy
- Custom contact form with CSRF protection and server-side input sanitization
- Reduced HTTP requests by 60%+ through asset minification; achieved sub-150ms page loads via caching

OrderFlow – Restaurant Management System [↗](#)

(live in production)

- Full POS system built with Next.js, TypeScript, and Firebase
- Increased operational transparency through real-time order tracking and full order history
- Role-based dashboards for admin and staff
- Menu management, sales reports, and full order history
- Demo of a system actively used by a real restaurant in production

AI Voice Assistant (Python) [↗](#)

- Voice-controlled assistant built with Python
- Fetches live news, plays music, and opens websites by voice command
- Integrated OpenAI GPT API for natural language AI responses

Himalark – Travel Website UI/UX Design [↗](#)

- Full UI/UX design from wireframes to final UI
- 9+ page designs including tablet-responsive layouts
- Complete design system with typography and color guidelines

ShopNepal – E-Commerce Store [↗](#)

- Built a WooCommerce store from scratch using WordPress and Elementor
- Configured product listings, categories and custom post types
- Mobile-responsive design across all devices
